

MARINE APPLICATIONS

CARBON FIBER REINFORCED SHEETS

CARBON FIBER REINFORCED SHEETS

PROPERTIES

- Carbon fiber epoxy matrix
- %80 weight reduction comparing to metal alternative
- High stiffness with superior tensile strength
- Non-corrosive
- Smooth surface
- Easy Integration
- Good electrical conductivity
- 2x2 twill carbon fibers sheets offers perfect durability and esthetics
- Extremely high strenght / weight ratio

USE

- Decorative Panels
- Electronic Enclosures
- Structural Reinforcement
- In dinghies or smaller boats, for lightweight and durable flooring
- Seat Bases
- Battery Trays
- Stylish table surface
-

CUSTOMIZATION

- Different dimension options such as;
 - 200x90cm
 - 100x45cm
 - 50x45cm
- Standard thicknesses
 - 0.5mm
 - 1.0mm
 - 2.0mm
- Custom sizes and thicknesses are available upon request
- Cutting and machining capabilities for special parts
